OAKLAND, Ind., 6th June, 1859.
J. C. Ater & Co. Gents: I feel it my duty to acknowledge what your Sarsaparilla has done for me, Having inherited a Scrotiduous infection, I have suffered from it in various ways for years. Sometimes it turned inward and distressed me at the stomach. Two years ago it broke out on my head and covered my scalp and cars with one sore, which was painful and loathsone beyond description. I tried many medicines and several physicians, but disorder grew worse. At length I was rediced to read in the Gospel Messenger that you had prepared an ulcraftee (Sarsaparilla), for I knew from your reputation that anything you made must be good. I sent to Cincinnati hud got it, and used it till it cured me. I took it, as you advise, in small doses of a tespoonful over a mouth, and used almost three bottles. New and healthy skin soon began to form under the seat, which after a while fell off. My skin is now clear, and I know by my feelings that the disease has gone from my system. You can well believe that I feel what I am saying when I tell you, that I hold you to be one of the uposites of the age, and remain ever gratefully.

Leucorelica or Whiles, Ovarian Tumor, Elevine Diceration, Femule Diseases.

"I most cheerfully compy with the request of year agent in saying I have found your Sarsaparlla a most excellent alterative in the numerous complaints for which we employ such a remedy, but especially in Female Diseases of the Scrohlous diathesis. I have cured many inveterate cases of Leucorrhea by it, and some where the complaint was caused by ulceration of the ulcrus. The ulceration listly was soon cured. Nothing within my knowledge equals it for these female derangements. Bedward S. Marrow, of Newbury, Ala, writes: "A dangerous ovarian tumor on one of the families in my family, which had defied all the remedies we could employ, has at length been completely cured by your Extract of Saraparilla. Our physician thought auching but extrapation could afford relief, lost resort before cutting, and it proved effectual. After taking your remedy eight weeks no symptom of the disease remains."

Syphilis and Mercurial Disease.

New Orleans, 25th August, 1859.

Dr. J. C. Aver: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Sarsaparilla.

I have cured with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of Teneral and Metalerial Sectors.

Teneral and Metalerial Sectors. One of my page consuming his malate and the top of his mouth. Your Sarsaparilla steady a considerable part of it, so that I believe the distorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla steady in the consuming his malate and the lower standard with the surface of the same distorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla true the selected, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sensitive to the weather that on a damp day she suffered exeruciating pain in her joints and bones. She, too, was cured entirely by your Sarsaparilla in a few weeks. I know from its formula, which your agent gave me, that this Preparation from your laboratory must be a great remedy; consequently, these truly remarkable results with it have not surprised me.

Exploration of the Island with a glance at the Land Office.

We must not raise our expectations of great results from the explorations of the expedition that started for Nootka Sound on Wednesday last too high. It is scarcely proroble that full information will be obtained respecting the mineral resources of the interior of the island on this pioneer trip. We must not be discouraged from prosecuting the researches further another year if we are not satisfied with the results of this. The very small amount of money which was placed at the disposal of the gentlemen moving in this matter, will preclude much being accomplished, beyond reconnoitering for future expeditions. It is much to be regretted that the Government have not done more to promote a thorough exploration of the Island; money spent in investigations in which every individual tax-payer, every inhabitant of the Colony is more or less interested. ought not to be laid out grudgingly or sparingly. At present more is known of the mainland than of the interior of the island, which is literally an unknown land. If, as is supposed by many, coal and minerals exist to any extent in the hitherto unexplored parts of the island, it is high time they were utilised; and it is most desirable that we should know whether or not there is accessible land in the interior of the island fit for agricultural purposes. Some information on this point we shall no doubt obtain through those who have started on this expedition if they even succeed in reaching the mountains in the centre of the island, from which observations of the surrounding country can be taken; and what is very important, we may rest assured that any inform mation which we receive will be reliable. Fortunately, as the exploration is unofficial in its character, we may hope for information without long formal reports, and without the surroundings of red-tapeism. We must admit that we have more faith in this expedition than we should have had if it had been undertaken by the Land Office. Nevertheless we cannot see why one of the two gentlemen, who do the ornamental part of that department, could not be spared from the office to do a little work in the interior, either the Chief Commissioner of Lands and Works, or the ex-Acting Surveyor-General of Vancouver Island, leaving his title and dignity behind him, might probably be spared from the office for a short time with advantage. We much admire the theory of keeping up the dignity of heads of departments; place them out of the reach of the public and there is less danger of jobbery. We would treat them in fact as Aristotle would have subjects treat Kings, if they are simply wanted as ornamental heads of

than riding daily to their office to enquire whether there is anything to be otium cumdignitate. We are quite prepared to allow that the head of such a department as that of the Lands and Works, in a flourishing and increasing colony, may have quite enough to do without putting his hand to pencil and paper, nor is it essential that he should be able to use a theodolite, the whole responsibility, it is true, of the survey of the towns and country lands rests with him; the arrangement of the whole system of public buildings depends upon him, and the roads and bridges must grow up under his superintendence, but if he has sufficient professional knowledge to be able to see his well-digested ideas properly carried out, always premising that his ideas are good, he may be a very fit man for his position. But in such a Colony as ours, where the people are highly taxed to pay for the luxury of being badly governed, the great desideratum is to have working men in the different departments with a working Governor at the head of them all; and until this end is accomplished we cannot hope for satisfactory progress as a Colony. Unfortunately; the Land Office is no exception to the rule in this Colony; the heads of it are not energetic enough to take the initiative in the exploration of the interior or in offering practical suggestions for the carrying out of those public works

ought to be, and sooner or later must.

be, undertaken. In speaking of this department of the Government and its chiefs, for really the Land Office seems to have two chiefs, we would call attention to the idea that prevailed in the office a short time ago of an increase to the building occupied by the Lands & Works Department, probably if the estimates for the improvement of the Governor's residence had been sufficiently elastic, or the margin in the vote for necessary repairs wide enough, an extra suite of rooms for one of the hends of this department would have been built before this time. We trust however, from the circumstance of the work not having been commenced, the Executive has come to a recognition of the folly and culpability of executing such needless, albeit trumpery and insignificant works in times like the present, when much that is really needed might be done.

#### Nova Scotia Repealers.

Recent advices place us in possession of the progress made by the Anti-Confederates of Nova Scotia to secede from the Dominion. At the election last autumn they elected al the members of the Provincial Assembly but two, and all the members to the House of Commons except one. Subsequently, howe ever, two members of the Commons-Stewart Campbell and a Mr McDonald-supposed to be Anti-Confederates, accepted the situation and supported the great Union party in the Commons, thus making the representation from Nova Scotia in the latter body, three Confederates and sixteen Anti-Confederates. a march a marcha and a marchanta and the marchanta

ter it framed an address to the British Parliament praying for repeal of the Union with the Dominion. The Hon. Joseph Howe left his place in the Commons and proceeded to England, as the advance guard of the Repealers, to urge their suit. He was followed by a delegation from Nova Scotia. on the same side, with whom he was to co-operate-About a month after Mr Howe took his denariure tue Louninion Cabinet appointed the Hon, Dr. Tupper, leader of the Nova Scotia Confederates, to proceed to England and place himself at the disposal of the Imperial Government to supply any information that it might require as to the constitutionality of the course pursued in making Nova Scotia a member of the Dominional compact, and also generally to oppose the policy of the Repealers. Mr Howe applied to the Colonial Secretary for repeal, but was met by a refusal - being told that Confederation was as much an Imperial measure as it was Colonial, and that the Imperial Government trusted to the loyalty of Nova Scotia to make the best of it. Mr Howe and colleagues then secured the parliamentary services of Mr Bright in their cause. The latter gentleman in June moved that an address be pre sented to Her Majesty, praying that a

Commission be appointed to proceed to Nova Scotia, to inquire into the causes of the discontent in that Province respecting the working of the British North America Act, 1867.' Mr Adderly in a very able speech opposed Mr Bright's motion. No discussion of any moment was elicited, except between Mr Bright and Mr Adderly. On division the House of Commons rejected the motion by a majority of 94. There were 67 for the motion and 161 against it. The Nova Scotia delegates, except Mr Howe, then returned home to confirm the telegraphic news of the discomfiture of their party. A section of the Anti-Confederate press, foreseeing the hopelessness of their cause, had already shown signs of taking a deeper interest in Dominional matters; but another sec tion induland in all kinds of rabid articles interlarded with threats of annexation and rebellion. Mr Howe, however, has since returned to Nova Scotia, and has published a letter repudiating in toto the extreme ofterances of some sections of the Auti press, thus leaving the extremists without the only leader that could have united the elements Of departments, and are not expected to the Anti party so as to make a show even to discharge any more arduous duties enforce their mistaken utterances. Hereafter we shall probably hear more or less of the doings of the Repealers; but we have no

done, we would rather see less of the last very long; and as for gaining strength, it is hopeless. The statistics of the electoral vote in Nova Scotia show that at the last election there were 48,000 voters under a new franchise inaugurated by the Howe party, which greatly reduced the number of voters, and which was tested for the first time last autumn. And yet with a franchise of their own making, there were only 22 500 votes cast for the Anti Confederates against 15, 000 for the Confederates. Ten thousand electors did not vote for either party or any party. The strength of the Anti-Confederates, at the best, is not therefore very great and when we consider that the history of Nova Scotia politics shows that the party in power has usually been put out of office at nearly every general election, or every four years, the probabilities are that at the next election the Confederates will be restored to office, and the intelligence of Nova Scotia will once more be triumphant.

CARD OF THANKS.

THE UNDERSIGNED DESIRE PUB-I liely to thank the Phonix Assurance Company of London, and their Agent at Victoria, for the liberality and promptinude under the circomstances with which their claim of Ten Thousand Dollars has been paid.

Victoria, July 29, 1868.

In explanation of the triffling delay in the payment of Messra cowen & Loewen's claim against the Phonix. Assurance Company of London for loss by fire on the night for the 16th inst., we would state, that the right of the fire as found by the Jury on the Fre Inquest, would revitated the folloy, but the Company, by table Telegram from London, empowered the Acting Agent here to waiter their legal rights and south the claim, it otherwise satisfactory.

#### Supreme Court.

[Before His Lordship Chief Justice Needham and a Special Jury.]

Friday, August 7.

Trounce vs Strachan & Ogilvy-This was an action brought to recover a sum of about \$2 000 damages alleged to have been sustained by plaintiff, who is a well known contractor and builder, against the defendant the former being the owner of the schooner Industry and the latter the master, for not having delivered a cargo of dimension sand stone at New Westminster for the erection of Holy Trinity Church.

The case commenced at one o'clock on Thursday and was continued till last evening. Numerous witnesses were examined on behalf of the plaintiff and the two defendant were called on their own behalf.

The learned Judge briefly summed up the time returned into Court with a verdict generally for plaintiff for \$750, with a finding that Strachan was also liable.

Mr Ring intimated he should move the Court at a future day to enter the verdict for the defendant, Strachan.

Messrs Wood and McCreight, instructed by Mr Bishop, appeared as counsel for the plaintiff. Defendants were represented by Mr Ring, instructed by Mr Pearkes.

OUR LUMBER INTERESTS .- At public meeting held last week at New Westminster, in regard to action of the Government towards Mr Rogers, and Mr Miller who were both present and explained their grievances; the following resolutions were unanimously agreed to: 'Having heard the statements and explanations just made by Mr Rogers and Mr Miller, it is the opinion of this meet. ing that the course pursued by the Govern-ment with regard to the Naval Reserve on English Bay and the Military Reserve on Burrard Inlet, is not only unjust to the present occupants, but that it is highly detrimental to the public interests. Resolved-That a committee be appointed for the purpose of urging upon the Government, either by petition or otherwise, the propriety of granting to Mr Rogers and Mr Miller upon the most liberal conditions, the right to cut timber upon the Reserves at present occupied by them; and in the event of there being insuperable objection to such a course, then to urge the justice of having the improvements owned by these parties properly valued, and suitable compensation made for the same; and that such committee have full power to act in the name and on behalf ot this meeting. Resolved -That Capt Irving, E Brown, Dr Black, Jas Cunningham, R Dickinson, J S Clute, W D Ferris, and the mover be appointed a committee, pursuant to the resolution just passed, and that they prepare a petition in accordance with the views expressed by the meeting, and wait upon the Governor with the same."

GREAT MAIL ROBBERY .- DALLES CITY, ---from Wullula, we learn the following: On Sunday morning, the 2nd inst., at about three or four miles this side of Pelican station on the Blue mountains, the Boise stage was attacked by four masked road agents, who, after stopping the stage and ordering the passengers to alight proceeded to rifle the mail bags of registered letters and abstracted from the treasure box of Wells, Fargo & Co., about six or seven thousand dollars in old hars and dust, together with all the

letters and packages it conta bers then directed their attention entirely to the sales of lumber in this city and imme the passengers, Major Jas. R. Mears, Pay- diate neighborhood, since the 1st January master U S A, and his clerk, Mr James A. Waters, the former of whom was relieved of all his private funds; but missing, happily, a large sum of government money concealed on his person. Mr Waters fared better losing only a small portion of what he had All the baggage except Mr Waters' was cut open and their contents well examined. After taking the lead horses belonging to the stage, the robbers quietly decamped, seemingly well satisfied with their booty .- Portland Paper,

How IT APPEARS .- There are at present a number of American families visiting Victoria for the benefit of the summer season, who are delighted with the climate and country. The reputation of both these is rising rapidly in the estimation of our American neighbors. Some of the gentlemen with the natural shrewdness of their nation are looking round into matters financially and prospectively. So satisfied are they of the future of Victoria that two are already contemplating investing in real estate. Our position, climate, coal, lumber, and what they hear of the interior, have so impressed them that they see at a glance the change which must rapidly come. So must every man who has had any practical experience on the Pacific Coast, see the same thing. At all events our freinds and neighbors will return to their homes and spread good news of us abroad, which of itself will be no trifl-

INDEPENDENT ORDER OF GOOD TEMPLARS This useful Order is quietly progressing in this city without making any ostentations display. They have fitted up a very neat hall in Fardon's building, Langley street, at a cost of over \$200, which was dedicated on last Wednesday evening by District Deputy Whitworth of Seattle. The order was first established here in September, 1866, beginning with some ten or twelve members and now numbers about sixty in good standing in this city, besides others residing in the interior. The officers elect for the present term will be installed on Wednesday evening next, when we shall be able to publish

PACIFIC INSURANCE COMPANY .- From the fifth annual statement of this company for the fiscal year ending 30th June, 1868, it appears the company are in a flourishing condition. The amount of capital is 181, 000,000, and the amount in excess of capital available to pay losses and dividends \$533,037. The assets, liabilities, income and oneral dishusaments, show an sonally satis factory figure. The company have wisely

adopted a practice coming rapidly into use of insuring ontstanding crops. Farmers in countries like this and California, who are liable to be burnt out by bush fires, will find great security in this practice.

DANGEROUS WORK. - Complaints have been lately made of the danger experienced by our citizens from the practice shooting of the navy. A few days since Tucinus Innis on crossing from Albert Head to Es quimalt on the common thoroughfare, had to beat a hasty retreat to escape the balls flying about him in all directions. Another small farmer has in his possession two cannon shot which he picked up in the vicinity of his house. This is not a very pleasant reflection for those having to pass through the neighborhood; and we are sure the evil has only to be mentioned to be remedied.

STEAMBOAT ACCIDENT .- News was received is town yesterday morning of a serious accident to the Lizzie Horner, a small boat belonging to the Telegraph Company On her way from San Juan to Victoria, on Thursday afternoon, her boiler burst, when she drifted on Discovery Island. The Superintendent was allowed the use of the Leviathan to bring her into port. Fortunately no injury was done by the explosion to the boat, or to any one on board.

GOLD SHIPMENTS .- The following are the shipments of gold from this Colony through Wells, Fargo & Co., on account of the Banks and themselves from the 1st of January to 31st July last :- Back of British Columbia, \$577.139; Bank of British North America. \$255,626; Wells, Fargo & Co., \$96,248; making a total of \$929,013; a sum far in advance of the amount shipped in the corresponding period of last year.

THE BARKER CLAIM .- Extract of a letter from Cariboo, of 28th Ju'y, to a gentleman in this city says :- The Barker claim looks first rate, they took out 114 ozs, last week, and when the wheel is completed and in work ug estat at alde ed at these gatt schoegel twice or three times that amount. I think the wheel will be running on Thursday.

THE steamer Fly left early yesterday morning for New Westminster. She took a very large freight, besides being compelled to leave some behind. The Rev. Mr Revnard and family left for Cariboo; the Ven. Archdeacon Woods for New Westminster Mr Johnston with the Kootenay Express and a number of others.

LUMBER SALES.—Upon inquiry it appears, ed a bill requiring all telegraph oper last, have averaged 200,000 feet a month. This amount is exclusive of that sold by Sproat & Co in disposing of their old stock at Alberni. Mr Sayward has made the largest sales during the period mentioned.

NAVAL .- We learn that H M S Satelite formerly on this station, has been ordered here from Abyssinia. The vessel has been recommissioned two or three times since leav-

HOLLOWAY'S OINTMENT.—A fair trial is al that is asked to prove the sterling and superior merits of this Ointment, and to demonstrate how much more successful it is in curing old ulcers, inveterate sores, and disfiguring eruptions than any other application. When properly used it lessens the inflammation, which invades parts adjacent to the wound or ulcer, whereby much plocal pain is immediately assuaged, and, in the course of an heur or two satisfactory results invariably follows, which will steadily advance to a thorough and permanent cure. This treatment, so much at variance with the old-fashioned views of cauterising, blistering, leeching, to., has by common consent been p nounced to the greatest blessing to persons thus afflicted.

By its aid the appetite is at once increased; digestion recovers its healthy tone; the vital forces are invigorated, and new

tone; the vital forces are invigorated, and new life infused into the system. The weak, debilitated and nervous victims awake to a feeling of true enjoyment, and life, once a burthen, becomes a source of pleasure.

Beware of the pernicious alcholic preparations, purporting to be tonics and stomachics, puffed up daily in the newspapers! Let them alone! alone!

HOSTETTER'S STOMACH BITTER

is the one pure and reliable tonic and invic-orator, and can be procured in every city, town and village in the country. HOSTETTER'S BITTERS have a permanent reputation, which is rapidly increasing as the years go by. All others are but mushrooms of the hour, and die off as quickly as they spring into existence.

None but a physican knows how much a

reliable alterative is needed by the people. Or all sides of us, in all communities everywhere there are multitudes that suffer from complaints that nothing but an alterative! cures Hence a great many of them have been made and put abroad with the assurance of being cffectual. But they fail to accomplish the cures they promise because they have not the intrinsic virtues they claim. In this state of the case, Dr. J. C. Ayer & Co., of Lowell, bave supplied us with a compound Extract of Sarsaparilla, which does prove to be the long desired remedy. Its peculiar difference from other kindred preparations in market is that it curcs the diseases for which it is recommended, while they do not. We are assured of this fact by more than one of our intelligent Physicians in this neighborhood and have the further evidence of our own experience of it truth .- [Tennessee Farmer, Nashville

How many thousants of perious, notice are there who are suffering out a mi-erable existence from the effects of secret undelgences, or from virus absorbed into the system. Look at their pallid, emactated and disfagred faces, and their broken down constitutions, disqualifying them from the happiness of marriage or of the eplayment of life. In this horrid situation thousands suffer until death closes the scene. Let parents, guardians, friends, attend to those who are suffering with any of those horrible, life-destroying malatice—see that they are carefor, and cured before it be too late. Send them immediately to Dr. Gimon, a physician who has made private diseases his especial study for years, who is certain to cure the most inveterate cases without mercury or any injurious drugs. It is important to those afflicted, or to those who are interested in the welfare of their frends, to be careful of the many pretended Doctors who indest all cities, publishing their skill in curing all diseases in a few days, imposing upon the public by using the names ofereinent physicians from Europe and other places. PREPARED BY

GRIMAULT & CO.

Chemists to H.I.P. Prince Napoleon,

PARIS.

THESE different medicines represent the most recent

edical disoveries, founded on the principles of Chemistry and Therapeutics. They must not be confounded with secret or quack medicines, as their names suffic ently indicate their composition; a circumstance which has caused them to be appreciated and prescribed by the Faculty in the whole world. They widely differ from hose numerous medicines advertised in the public papers as able to cure every possible disease, as they are applicable only to but a very few complaints. The mos stringent laws exist in France with regard to the sale of medical preparations, and only those which have under gone an examination by the Academy of Medicin and have been proved efficacious, either in the hospitals or in the practice of the first medicalmen, are authorise by the Government. This fact must be a guarantee for the excellence of Mesars. Grimault et Co.'s Medi
